## Alberta's International Merchandise Exports

### January - March 2006

### Highlights

**Overview:** In the first quarter of 2006, Alberta's international merchandise exports rose sharply by 28.5% from the same period last year, to \$22.5 billion. Higher crude oil and natural gas shipments accounted for 87% of this increase. Excluding these two commodities, the value of total exports (\$6.6 billion) grew by 10.6%. Live cattle exports have rebounded sharply since the U.S. lifted its import restrictions and reached a record high in March. In the first quarter, most of Alberta's export growth was price driven because of higher energy prices.

**Major Commodities:** In the first quarter, price and volume gains spurred crude oil (+41.3%), ethylene polymers (+27.1%), polyethylene (+32.2%) and refined petroleum product (+210.2%) sales. Higher prices pushed natural gas shipments up 35.1%. Live cattle, not exported in first quarter 2005 reached \$220 million in the first three months of 2006. Exports of beef products decreased by 34.9% and shipments of ethylene glycol declined by 56.5%, due to lower volumes and prices. Lumber and oriented strand board (OSB) deliveries fell by 7.4% and 5.6%, respectively, due to lower prices.

**Exports by Industry:** Exports in the mining and energy sector jumped by 36.7%, largely due to the gains made by natural gas and crude oil. Primary agricultural shipments climbed sharply by 75.7% due to a steep rise in livestock shipments (+787.3%), while improved oilseed exports lifted crop shipments (+21.5%). Manufacturing exports grew by 3.8% because of volume driven export gains, especially for *petroleum & coal products*. Large export gains were also noted for *transportation equipment* and *fabricated metal products*.

**North America:** Exports to the U.S. increased sharply by 32.9% and accounted for 91.4% of the total value of Alberta exports. Deliveries of natural gas, crude oil, propane, ethylene polymers, polyethylene and cattle increased strongly. Mexican

imports of Alberta goods rose by 8.3% due to higher shipments of canola and polyethylene.

**Asia:** Exports to Asia shrank by 12.9% due to lower ethylene glycol, sulphur and wheat deliveries. Exports to China, Alberta's second largest trading partner, fell by 36.3% because of lower shipments of ethylene glycol and wheat. Japanese deliveries declined by 1.8% due to lower canola, pork and lumber deliveries. Exports to Singapore tripled because of sharply higher nickel shipments.

**Europe:** European imports declined by 6.6% with sales of nickel, cobalt and wood pulp decreasing. Exports to Germany rose sharply due to a large increase in canola oil deliveries. Large declines were noted for Belgium, the United Kingdom and Italy due to lower nickel sales. Exports to the Netherlands fell on lower cobalt shipments.

**Middle East and North Africa:** Exports to the Middle East and North Africa rose by 1.3%. Large export increases to the region were registered for drilling equipment, durum wheat and barley. Higher shipments were noted for Algeria, Saudi Arabia and the United Arab Emirates.

**Other Regions:** South American imports increased by 14.7% due to large rises in wheat and durum wheat, and oil & gas field equipment deliveries. Increased sales of refined petroleum products (diesel fuel) to Guatemala pushed Central American imports up sharply by 105.9%. The Commonwealth of Independent States imported 37.8% more Alberta merchandise, with large increases noted for trailers and pork. The Oceania region's imports fell by 16.8%, with Australia leading this decrease. Sub-Saharan Africa's imports retreated by 10.1% because of fewer shipments of sulphur and machine parts.

\* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.
